RECEIVED

MAY 31 1995

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

Ex Parte

Mr. William F. Caton
Acting Secretary
Federal Communications Commission
1919 M Street, N.W. Room 222
Washington, D.C. 20554

Re: PR Docket No. 92-235

Dear Mr. Caton:

This is to notify you, pursuant to Section 1.1206(a) of the Commission's Rules, that Carl Greenway and Jeffrey Sheldon, representing UTC, The Telecommunications Association, made a presentation to the staff of Commissioner Chong yesterday afternoon on the "refarming" of the Private Land Mobile bands below 512 MHz as proposed in the above-referenced docket.

UTC stressed the importance of private land mobile radio systems to electric, gas and water utilities and natural gas pipelines. UTC noted its support for the consensus plan developed by UTC and other organizations which collectively represent the vast majority of licensees in the affected bands. UTC objected to the adoption of any plan that does not allow sufficient time for amortization of existing equipment or which does not provide sufficient time for the development of a competitive marketplace in quality radio equipment with features needed by utilities and pipelines for their critical land mobile communications.

A copy of the handout used during UTC's presentation is attached for filing in this docket. Two copies of this notice are submitted pursuant to Section 1.1206(a).

If there are any questions concerning this matter, please let me know.

Very truly yours,

Jeffrey L. Sheldon
General Counsel

cc: Jill Luckett (w/o enc.)

**SUMMARY OF UTC POSITION ON
PRIVATE LAND MOBILE "REFARMING"
PR Docket No. 92-235**

1. Introduction
2. Why Utilities/Pipelines Operate Private Systems
3. Summary of UTC's Position:
 - A. Transition Timing -- UTC supports industry consensus plan for graceful migration to new technologies.
 - B. Consolidation of Radio Services -- Some consolidation might be appropriate.
 - C. Public Service Mutual Aid Channels -- Channel pairs in the VHF and UHF bands should be designated for public service mutual aid use.
 - D. Power/Height Limits -- Use a "safe harbor" table of recommended power/height combinations.
 - E. Trunking -- Rules should encourage, but not mandate, trunking.
 - F. "Innovative Shared Use" channels -- channels created through refarming should be retained for primarily private land mobile operations.

WHY DO UTILITIES THINK THEY NEED PRIVATE SYSTEMS?

PAST HISTORY

NORTHEAST BLACKOUT

HINSDALE FIRE

TELEPHONE CENTRAL OFFICE OUTAGES

SOFTWARE PROBLEMS TYING UP NETWORKS

SAN FRANCISCO EARTHQUAKE

CUMULATIVE EXPERIENCE

BELL OPERATING COMPANIES

SMRs

AT&T

CELLULAR TELEPHONE COMPANIES

CABLE CUTS

NATURAL DISASTERS

WHAT DO WE USE OUR PRIVATE SYSTEMS FOR?

BLACK START EMERGENCIES

LOCOMOTIVE CONTROL

CRANE CONTROL

CABLE PULLING

TRANSMISSION LINE CONSTRUCTION

POWER PLANT OPERATION & MAINTENANCE

CIRCUIT SWITCHING

CONNECTS/DISCONNECTS

CREW COORDINATION

NUCLEAR PLANT SECURITY

EMERGENCY RESTORATION OF POWER

RETRIEVING DATA FROM SUB-STATIONS

DATA FROM VEHICLES

AUTOMATED METER READING

AUTOMATED VEHICLE LOCATION

SYSTEM CONTROL

POWER FACTOR CORRECTION

RECOVERY FROM NATURAL DISASTERS

**WITHOUT TWO-WAY MOBILE RADIO, PRODUCTIVITY FOR AN ELECTRICAL UTILITY
WOULD DROP BY 50-80%!!!!!!!**

THERE IS A CONSTANT GROWING NEED FOR MORE CHANNELS!

RECOVERY FROM NATURAL DISASTERS MUTUAL AID CONCEPT

**EARTHQUAKES
HURRICANES
TORNADOS
FLOODS
WALL WINDS
ICE STORMS
HIGH WINDS
ELECTRICAL STORMS**

PROPOSED PART 88 TRANSITION PLAN

	Year 2 (e.g., 1/1/1997) <i>[Example dates assume 1/1/1995 effective date of new rules]</i>	Year 12 (e.g., 1/1/2007)	Year 16 (e.g., 1/1/2011)	Year 26 (e.g., 1/1/2021)
MANUFACTURERS	All new equipment which is sold must be maximum 12.5 kHz* or 12.5 kHz compatible (e.g., dual-mode 25/12.5 kHz; but not single-mode 25 kHz equipment)		All newly type accepted equipment must be maximum 6.25 kHz* or 6.25 kHz compatible. (e.g., dual-mode 12.5/6.25 kHz, but not single-mode 25 kHz or 12.5 kHz equipment)	All new equipment which is sold must be maximum 6.25 kHz* or maximum 12.5 kHz if convertible to 6.25 kHz.
URBAN** SYSTEMS Existing Systems		All urban systems must operate at no more than 12.5 kHz* bandwidth to retain primary status.		Must operate at no more than 6.25 kHz* bandwidth to retain primary status.
New Systems***	Must operate at no more than 12.5 kHz* bandwidth to attain primary status.		Must operate at no more than 6.25 kHz* bandwidth to attain primary status.	
RURAL** SYSTEMS Existing Systems				Must operate at no more than 6.25 kHz* bandwidth to retain primary status
New Systems***	Must operate at no more than 12.5 kHz* bandwidth to attain primary status.		Must operate at no more than 6.25 kHz* bandwidth to attain primary status.	
SECONDARY OFFSET USERS AT 450-470 MHz (All Markets)	May attain co-primary status with other new systems if operations are limited to no greater than 12.5 kHz bandwidth.			Must operate at no more than 6.25 kHz* to attain primary status as against all users

* Bandwidth limitations may be exceeded if the system will operate with efficiency equivalent to or better than the stated bandwidth. For purposes of type acceptance, the radio must be capable of net data throughput of at least of 4.8 kbps.

** "Urban Systems" are those located within 100 miles of any of the top 60 urban areas listed at Section 90.741. All other areas would be considered "Rural." Upon request by a petitioning party, other areas of the country may be declared "Urban" upon a showing of increased frequency congestion necessitating early introduction of spectrum efficient technologies.

*** A "new system" is one which is not functionally integrated with an earlier-installed land mobile radio system. To be considered an "existing system," the facilities must be in operation prior to the relevant deadline or must be functionally integrated with such a system. For example, a new repeater site which will be used to extend coverage of an existing system and will relay traffic of mobiles currently operating with an existing system would not be considered a "new system." (See definition of "Land Mobile Radio System" at Section 90.7).

PROPOSED PART 88 TRANSITION PLAN

	January 1, 1997	January 1, 2005	January 1, 2015
MANUFACTURERS	All new equipment which is manufactured, imported or sold must be maximum 12.5 kHz* or 12.5 kHz compatible (e.g., dual-mode 25/12.5 kHz; but not single-mode 25 kHz equipment)	All <u>newly</u> type accepted equipment must be maximum 6.25 kHz* or 6.25 kHz compatible. (e.g., dual-mode 12.5/6.25 kHz, but not single-mode 25 kHz or 12.5 kHz equipment)	All new equipment which is manufactured, imported or sold must be maximum 6.25 kHz* or maximum 12.5 kHz if convertible to 6.25 kHz.
URBAN** SYSTEMS Existing Systems		All urban systems must operate at no more than 12.5 kHz* bandwidth to retain primary status.	Must operate at no more than 6.25 kHz* bandwidth to retain primary status.
New Systems***	Must operate at no more than 12.5 kHz* bandwidth to attain primary status.	Must operate at no more than 6.25 kHz* bandwidth to attain primary status.	
RURAL** SYSTEMS Existing Systems			Must operate at no more than 6.25 kHz* bandwidth to retain primary status
New Systems***	Must operate at no more than 12.5 kHz* bandwidth to attain primary status.	Must operate at no more than 6.25 kHz* bandwidth to attain primary status.	
SECONDARY OFFSET USERS AT 450-470 MHZ (All Markets)	May attain co-primary status with other new systems if operations are limited to no greater than 12.5 kHz bandwidth.		Must operate at no more than 6.25 kHz* to attain primary status as against all users

*Bandwidth limitations may be exceeded if the system will operate with efficiency equivalent to or better than the stated bandwidth. For purposes of type acceptance, the radio must be capable of net data throughput of at least of 4.8 kbps.

** "Urban Systems" are those located within 100 miles of any of the top 60 urban areas listed at Section 90.741. All other areas would be considered "Rural."
